

1. Role Prompting

"Act as a world-class high school teacher. Explain how GitHub works to a complete beginner using a simple real-life analogy."

2. Clear Task + Format

"Create a clean table comparing Fast Mode vs Heavy Mode in Grok. Include columns: Speed, Quality, Best Used For, and Examples."

3. Chain of Thought

"Think step-by-step. Explain the difference between a Repository, Commit, and Branch in GitHub. Show your reasoning before giving the final answer."

4. Context + Task Separation

CONTEXT: I am a beginner learning AI and GitHub.

TASK: Create a simple 7-day learning plan for me focusing on prompt engineering."

5. Heavy Mode Activation

"Activate Heavy Mode. Compare the top 3 ways to structure prompts in Grok and recommend the best one for daily use."

6. Output Control

"Explain prompt engineering in exactly 3 bullet points. Make each point under 15 words."

7. Tone Specification

"Explain version control like I'm 15 years old. Use fun, simple language and at least one emoji."

8. Step-by-Step Instruction

"Write a step-by-step guide on how to create my first repository on GitHub. Number each step clearly."

Advanced Practice Prompts**9. Multi-Agent / 4-Agent**

"Use 4-Agent Heavy Mode. Analyze the pros and cons of using GitHub for an AI learning project."

10. Self-Critique

"Write a 150-word introduction about prompt engineering. Then critique your own writing and improve it."

11. Style Matching

"Rewrite this sentence in the style of Elon Musk: 'Artificial intelligence is going to change the world in many ways.'"

12. Improvement Request

"Improve this prompt to make it much better: 'Explain AI'"

13. Comparison

"Compare Markdown, Notion, and Google Docs for managing an AI learning project. Use a table."

14. Creative Visualization

"Create a powerful real-world analogy that explains what 'Heavy Mode' does in Grok."

15. Structured Output

"Create a daily checklist for my AI learning habit. Include Morning, Evening, and Tracking sections with checkboxes."

Creative & Writing Practice Prompts

16. Content Creation

"Write a short, engaging LinkedIn post about why beginners should build a public AI Learning Project on GitHub."

17. Summarization

"Summarize the concept of prompt engineering in a way that a high school student would easily understand."

18. Persuasive Writing

"Write a persuasive paragraph convincing a friend to start learning prompt engineering."

19. Analogy Practice

"Explain the concept of 'Commit' in GitHub using a real-life analogy."

20. Meta Prompting (Practice Improving Prompts)

"Here is a weak prompt: 'Tell me about AI'. Improve this prompt in 3 different ways to get much better answers."

Would you like me to:

- Turn these into a ready-to-upload Markdown file for your GitHub repo?
- Create 20 more advanced practice prompts?
- Add a practice log template so you can track which ones you've tested?

Just tell me!
